EDUCATION

The University of Lahore

January 2021 - July 2025

Bachelor's degree in computer software engineering

Lahore, Punjab, Pakistan

- **GPA: 3.25/4.0**
- **Relevant Coursework:** Data Structures & Algorithms, Database Management Systems, Web Development, Software Engineering, Machine Learning, Object-Oriented Programming, Computer Networks

PROJECTS

Social Media App (FYP)

June 2025

Full-Stack Developer (Project)

Engineered a full-stack social media application with real-time messaging using WebSocket and Redis for session management

- Integrated AI/ML model for detecting deep-fake content in images and videos, enhancing user trust.
- Developed real-time messaging with WebSocket and Redis for efficient session management.

Stacks: *React, Node.js, TypeScript, MongoDB, Express, Redis, Tailwind CSS, Tan Stack Query, Zegocloud.*

Job Portal with AI-Powered Features

April 2025

Full-Stack Developer (Project)

Self-initiated full-stack project creating an intelligent job portal platform with AI-powered resume analysis and video interview assessment capabilities. Designed to streamline recruitment processes through automation and machine learning integration

- Built a comprehensive job portal with candidate-employer matching system and application tracking
- Developed AI-powered resume analyzer to extract and score candidate qualifications against job requirements

Stacks: *Node.js, TypeScript, MongoDB, Express, Stripe/Payment Gateway, OpenCV/TensorFlow*

E-Commerce Platform (Client Project)

Jan 2025

Full-Stack Developer (Freelance)

Delivered production-ready e-commerce solution for client with complete admin dashboard featuring sales analytics, inventory management, and real-time order monitoring

- Implemented role-based access control (RBAC) system with granular permissions managing admin, vendor, and customer roles with secure authentication
- Developed responsive React frontend with intuitive user interface for product browsing, cart management, and checkout process
- Created RESTful API architecture using Node.js and Express with MongoDB database, ensuring scalable and maintainable code structure

Stacks: *React, Node.js, TypeScript, MongoDB, Express, Payment Gateway (Stripe), Tailwind CSS*

CERTIFICATIONS, SKILLS & INTERESTS

- **Certifications:** IBM Front-End Developer  , Foundations of Cybersecurity  , Foundations of Cybersecurity 
- **Technologies:**
React.js, TypeScript, Next.js, Node.js, Express.js, MongoDB, Postgres SQL, Redis, Tailwind CSS, Git, Linux, Shell Scripting ,Docker,GitLab,Nginx
- **Interests:** Ongoing Education Scaler Backend Development Bootcamp (Expected Completion: February 2026) **Intensive backend engineering program** focusing on **DevOps, cloud computing (AWS)**, containerization (**Docker/Kubernetes**), CI/CD pipelines, and distributed system architecture
